B. Other Items of Concern to the Committee

22. Requirements

Problem: To develop as necessary adequate arrangements for providing coordinated requirements by priority for the several collection units.

Status: a. The IAC has established an Interagency Priorities Committee to develop coordinated guidance for covert collection. This Committee, operating under the chairmanship of O/SO, has developed agency lists of 50 most important geographical targets for collection. In the Navy case these are functional targets. A Task Group has been established to develop some means of reaching agreement on the single governmental list of 50 targets.

b. The Economic Committee has established a subcommittee on requirements for economic reporting with the specific mission of developing coordinated priority guidance for State Department use in the administration of Foreign Service reporting.
